ReBAR™ SUPPORT PRODUCTS

LOCKING SPACER WHEEL are made to lock onto multiple rebar sizes from a #3 bar to a #6 bar. The points around the wheel create a minimal surface touch around the bar when it is installed, and our zip locking system holds the bar tightly in place to eliminate any chance of sliding. The Locking Wheel can be used for many concrete jobs and work such as precast structures, vaults, slabs and frames, foundations, bridges, and much more.

Item	COVER	BAR SIZE	LBS / BOX	QTY/BOX	PALLET	Box/Pallet
